Work Experience

FedEx Express

Hyderabad, India

FULL STACK DEVELOPER SENIOR I

Feb 2024 - Present

- Built a scalable, event-driven microservice to intercept **~5M daily shipments**, routing events for fraud prevention, address updates, reschedules and duty/tax resolution.
- Designed and implemented a high-throughput TopDB service to migrate **~20M records** and synchronize real-time data between DB2 and Oracle databases, eliminating the need for a **CDC** license.
- Implemented robust **CI/CD pipelines** using Jenkins and GitHub Actions, incorporating automated quality checks and security validations resulting in improved code reliability, and faster release cycle.
- Implemented centralized **logging, observability, and monitoring** for microservices by configuring dashboards to track request volumes, validation failures, and error rates, and also enabling real-time service health monitoring and alerts through threshold-based metrics.
- Enhanced the **Intercept Portal UI** using Angular, adding robust data validation, error highlighting, pagination, file upload/download, and package tracking, greatly improving **user experience** and **operational efficiency**.
- Took initiative to attend optional cross-timezone meetings with development and product teams, consolidated key information, and **documented technical insights**—enhancing team clarity, minimized project blockers and accelerating delivery.

Tools/Technologies: JAVA, Spring Boot, Angular, DB2, Cassandra, Redis, JMS, PCF, Splunk, AppDynamics

Infinx Healthcare Pvt Ltd

Bangalore, India

SENIOR SOFTWARE ENGINEER

Dec 2021 - Feb 2024

- Worked in developing a product which facilitates in automating any kind of manual Web and API based processes resulting in hundreds of **FTE savings**.
- An end-to-end development of a product Infinx Automation Solutions to provide an interface for the customers wherein they can upload thousands of input data in a batch for any subscribed workflows and get responses notified in a concurrent and asynchronous way.
- Worked in proximity with product owners enabling them an advanced reporting and billing metrics and also greater transparency for customers.
- Implemented microservices architecture using Rest API and message brokers to enable asynchronous communication between services.
- Implemented **webhook events** resulting in easy integration with other applications.
- Provided **on-call support** for production, resolving critical bugs and issues during late hours to ensure immediate service restoration.
- **Took interviews** and worked as a team player by on-boarding junior members and extending help to peers.

Tools/Technologies: JAVA, Python, Javascript, Spring Boot, Postgres, MongoDB, Docker, Camunda, AWS, ELK Stack

Mindtree Ltd

Bangalore, India

SOFTWARE DEVELOPMENT ENGINEER

July 2019 - Dec 2021

- Contributed to an existing web application SODA which serves as an ordering and delivery application for the airline client through multiple user stories.
- Developed and altered Rest API for integrating new flows in the existing web application.
- Scheduled jenkins jobs to fetch and dump data using python and SQL queries.
- **Coordinated deployments** of new software, feature updates and fixes.
- Participated in the upscaling initiative to acquire proficiency in tools and skills outside the track.

Tools/Technologies: JAVA, Python, Spring, Rest API, MySQL, Jenkins

Education

Asansol Engineering College, Asansol (MAKAUT, Formerly WBUT)

West Bengal, India

B.TECH IN INFORMATION TECHNOLOGY, CGPA: 7.24/10.0

Aug 2015 - June 2019

Achievements

- **Bravo Zulu 2024-25** Recognized and rewarded for outstanding effort in delivering the intercept application.
- **Rising Star 2022-23** Rewarded for exceptional technical skills and unwavering commitment to producing top notch work.
